

Scout Sentinel™ 4G/Cat-M1 Personnel GPS Tracker Badge Personnel Tracking ID Badge with GPS, Bluetooth & 4G/Cat-M1 Cellular *Product Specifications & Capabilities*

Primary Usage – Worksite or offsite GPS tracking of personnel, indoors & outside

Made in the USA – Designed, engineered & built in Gainesville, Florida, USA

- **Device:**
 - Lightweight electronic plastic badge w/ picture ID housing
 - Outdoor GPS location / Indoor Bluetooth proximity location
 - 32-bit ARM® Cortex®-M4 processor
 - Bluetooth 5 multiprotocol radio/BLE
 - Accelerometer
 - Wideband 4G/LTE worldwide cellular antenna
 - Over-the-Air firmware/feature updating
 - Secure & encrypted data transfer
- **Size/Weight:**
 - Size: 4.2" x 2.3" x 0.4" - Weight: 60g (2.1oz)
- **Capabilities:**
 - Tracking outdoor location of personnel 24/7 with visible ID badge
 - Tracking inside locations where BLE mesh networks established
 - Generates safety alerts upon entry into restricted zones
 - Generates reports of entry/exit/duration in geofenced zones
 - Maintains recorded "history" of locations (user determined timeframe)
 - Optional alerting upon falls or upon using BLE-tagged restricted equipment
 - Connectivity to & data transmission from any BLE sensors in proximity
 - Google IoT; customizable iOS & Android mobile apps and Desktop web-app
- **Battery/Life:**
 - Standard battery life depends on frequency rate of updates, from 36 to 72+ hours
 - Micro-USB port for charging or connection to external battery
- **Peripherals:**
 - Connects with & transmits data from external BLE sensors or peripherals
- **App/Database:**
 - Multi-location/multi-manager tracking capabilities
 - Mobile apps in iOS, Android & Desktop web-app customizable to application
 - Secure data transmission to customer host servers or via API
